## CHAPTER 1; Introduction To Enochian Science.

Enochian science is based on the system of Enochian magic given to the world about 500 years ago. It was first given in so called modern times by Dr. John Dee and his scryier Edward Kelly. Dr. Dee was court astrologer to Queen Elizabethan of England. Towards the end of the sixteenth century and the beginning of the seventeenth century he engaged in a crystal viewing operation with Edward Kelly and they received 49 tablets of 49 by 49 squares. At the time Dr. Dee felt he had made contact with angels. In our time many believe he made contact with extraterrestrials.

In this introduction I refer to it as Enochian science because much of a scientific nature can be done with it. One use would be as developing color schemes for video games. Each square can be made into a pyramid made up of four of the ancient elements and an Enochian letter and give a definite emotional feeling. The Enochian system is reminiscent of the writings of Raymond Lully in about the 12<sup>th</sup> century. Raymond Lull combined elements into short paragraphs and essays that allegedly gave all possible combinations of human experience. He wrote numerous works by the two that are most similar to the Enochian system of magic of Dr. Dee are the Ars Nuevo

and the Ars Brevis. The Ars Demonstrativa included the four ancient elements of Earth, Air, water and Fire and the newer element of spirit to create its possibilities. The Ars Brevis was shorter because it included the four elements of Earth, Air, water and Fire but not spirit.

This introduction is for a work I call 'The Comprehensive Enochian dictionary and Lexicon. A lexicon is more than a dictionary in that it includes other than definitions of words. The C.E.D. as I call it includes definitions, numerical values and 'addresses' or a telephone book type compilation of letters, numbers and symbols. The goal of these 'addresses' is to be able to call forth a composite talismanic image of each square that can be communicated with by meditation, high magic and calling forth possibilities that can be applied to the physical plain. Several of many possibilities is a combination of four earth squares and an Enochian letter, Earth squares combined with other elemental squares and an Enochian letter and many other possible combinations. In all there are over 5,000 combinations that can give all kinds of environments.

This work also includes combinations from a circular tablet of seven names of seven ruling angels called the Bonorum. There is also a tablet called the Seal of Truth or in Enochian Segilium de Amet. It is similar to a tablet first devised by Cornelius Agrippa, a magician who worked with angels before Dr. Dee and Mr. Edward Kelly. The angels of the Bonorum can be divided into a number of matrices of the seven planets of the ancients, the ten modern planets of our solar system, the twelve signs of the Zodiac, the 16 to 18 characters of Geomancy and in a final distribution or 88 complete signs of the zodiac that can be seen from the Northern and Southern hemisphere of Earth. Since these star constellations are so far away from us they would be valid even at the limit of the Oort cloud that marks where our solar system ends and interstellar space begins. It is basically a frame of reference. If the 88 constellations are expanded in a conic form and combined with steeped partition functions they could give meaningful coordinates to anything in our Universe usable for meditation, rising on the planes or magic.

This Introduction is attached to three of five works on The

Enochian System by Frater Bach an American Rosicrucian and Qabalist. The first volume Is The Comprehensive Enochian Dictionary and Lexicon Enochian to English letters A to I. The second volume is The Comprehensive Enochian Dictionary and Lexicon J to Z Enochian to English and the third volume is Comprehensive Enochian Dictionary and Lexicon Gemantria numbers 1 to 500.

This work is to be used as a meditation tool and one for high magic working. Not only are Enochian words listed which are used in other works on the subject but also some that are derived by combining the attributes of the squares that go into making up the truncated pyramids of the various tablets given by Dr. John Dee in the early 17<sup>th</sup> century, the Golden Dawn and others through our 20<sup>th</sup> century. These square names are mnemonic devices and useable in making magical squares which are meditated on and used to form mental images. The squares of names and the pyramids are turned into words and additional tablets and used in meditation and magic working. Mental and spiritual images are created on the higher plains and as they come down the planes they become more manifest on the physical planes as environments for meditation or magic working.

In Enochian magic or as I prefer to call it, Enochian science, numbers are as important as words and can be changed into letters. This is where the Gemantria comes into play. It list attributes of numbers and similar numbers which either have the same meaning or are related. Only the numbers of approximately 1 to 500 are given. There are other numbers mentioned in various works in Enochian magic which are not listed. These are large and sometimes have 5 or more places. The ones we have are not consecutive and may be anagrams. When large numbers are used they usually represent collections of characteristics associated with the planets of Geomantic signs.

There are many works available these days and most of them are given in the Bibliography. One of the best is in Regardi's Golden Dawn the section on the 'Concourse of the Forces. Other works are those by the Schueler's and the Zalewski. They are listed in the bibliography and should be acquired and read and studied by those

who are interested in the Enochian system or magic or science as ones inclination may be. Read on, learn and enjoy.

## ***Numeric or Germantic values of Enochian Words***

Below are assorted Geomantic values for the numbers 1 to 500. In the Enochian system of magic first used by Dr. John Dee in Elizabethan England numbers can be substituted for letters. If the number value of two words are the same, even if they are different, there is a connection. This work includes the values of various formulas of the square combinations that are not strictly words. The square attributes are useful in meditation and magic working to those who subscribe to these possibilities. To get the full value of the numerical attributions one should be familiar with the Enochian System of Angelic magis. A number of works are available on this subject of Enochian magic. This work is one of a number of works by the same author that is forthcoming.
